

AJIT LONKAR

Sr. DevOps Engineer

SKILLS

- AWS
- Kubernetes
- IaC: Terraform, Ansible
- CI-CD: Bitbucket Pipeline
- Scripting: Python, Bash
- Monitoring - DataDog, ELK Stack, Grafana
- GitOps: ArgoCD, Helm, Docker, Kustomize
- DevSecOps: Snyk
- OS- Linux, Windows
- Artifactory: Jfrog
- Other: Git, Jira

AWS KEY SERVICES

- Compute - EC2, Lambda, ECS
- Storage- S3, EFS, EBS
- Network - VPC, TGW, Route53, API GW
- Serverless- Lambda, Fargate, SNS
- Security- IAM, Amazon Inspector, Secret Manager
- Containers-EKS, ECR, ECS
- Databases-RDS, DynamoDB, Keyspaces

CERTIFICATIONS

- CKA-Certified Kubernetes Administrator
- AWS Certified Solutions Architect – Associate

LANGUAGES

- English
- Hindi
- Marathi

SOFT SKILLS

- Highly Focused
- Problem-solving
- Integrity
- Adaptability

EDUCATION First Class Distinction

- M.Tech 2015-2017 J.N.T.U HYDERABAD
- B.E. 2010-2014 PUNE UNIVERSITY

CONTACT

- 7058675724

- ajit-lonkar
- Pune, Maharashtra

PERSONAL PROFILE

Experience: 7.9 + Years

- **Certified** Senior DevOps Engineer with a proven track record of building and maintaining fault-tolerant, highly-available, scalable, and secure production systems on **AWS** Cloud.
- Specialized in **Kubernetes** deployment and management across self-managed (**bootstrapped**), AWS EKS, and EKS-Fargate.
- Proficient in implementing **GitOps**-based centralized deployment pipelines using ArgoCD & Helm. (app-of-apps pattern of ArgoCD)
- Skilled in Infrastructure as Code (**IaC**), utilizing **Terraform** and Ansible for automated deployment and configuration
- Expertise in optimizing **CI/CD** pipelines for reliability and scalability.
- Diagnosed & resolved application, container, and **network** (TCP/IP) issues.

WORK EXPERIENCE

- **Nice North America** | June 2021 - Present
Sr. DevOps Engineer
 - Owned and operated a **large-scale complex AWS** environment encompassing 22 consoles (primary POC for 5 accounts), 350+ EC2 servers, and **7 Kubernetes clusters**, guaranteeing **HA** and performance
 - Integrated AWS accounts with centralized OPS & Networking accounts via Terraform Cloud & Transient Gateway(**TGW**)
 - Innovated k8s **autoscaling** via Keda (100 to **15000+ pods** within 9 min)
 - Migrated 13 legacy apps to Kubernetes using Docker & Helm, achieving 35% infrastructure cost reduction & improved performance.
 - Extensively worked on migrating CI/CD Jenkins pipelines to **Bitbucket** pipelines enhancing efficiency, security, and reliability.
 - Enhanced CI/CD **security** by integrating **Snyk** for vulnerability scanning
 - Resolved Gold Images automation using Lambda (Python) & EC2 builder.
 - Achieved an **80%** reduction in agent setup time with Terraform & SSM.
 - **Automated** DevOps tasks with 10+ **Python**-powered Lambda functions
 - Redesigned **centralized Logging** and **Monitoring** using DataDog, later migrated to ELK Stack and Grafana.
 - Set up alerts based on **log analysis** using Grok pattern pipelines.
 - Executed database migrations (MySQL, Cassandra, MongoDB) to AWS solutions (RDS, Keyspaces, DocumentDB).
 - Replaced **SSH**-based access with AWS Systems Manager (SSM).
 - Set up **Jfrog** Artifactory (replacing S3) for artifact management.
 - Redesigned innovative CI/CD solutions, resulting in ~\$28k/year savings.
 - Initiated in-House logging & monitoring system (~ \$190k per year saving).
- **MIBA Engineering Center India (MEC)** | July 2018 to May 2021
DevOps Engineer
 - Led large scale legacy applications migration to **Kubernetes**.
 - Implemented K8s secret management via **Sealed Secret** & init container.
 - Managed 3 k8s clusters for high availability, scalability, & security.
 - Accelerated AWS cost optimization, achieving 40% savings from S3
- **Tata Technologies** | Aug 2016 to July 2018
Big Data Admin
 - Configured, deployed, and maintained Big Data Hadoop clusters and ecosystem components.
 - Performed **Linux kernel tuning** (Cent OS) using **shell scripts** & Ansible.
