Professional Summary

Engineering Manager | Software Architect | Leader in Microsoft Technologies

Results-driven professional with over 19 years of experience in programming, web application development, and software architecture, specializing in Microsoft technologies. Adept at leading teams to design and deliver enterprise-level software products and cloud platforms using .NET Core, Azure Cloud, AKS, and microservice-based distributed systems. Currently serving as an Engineering Manager at Energy Exemplar, Pune, India. Extensive experience working with Fortune 500 companies such as JP Morgan Chase, Wolters Kluwer, and SunGard (now FIS).

Core Skills

Cloud & Architecture	Azure, AKS, Microservices, App Services, Distributed Systems, docker, Gen AI, Azure cognitive AI service
Programming	ASP.NET, .NET Core, Angular, TypeScript, JavaScript, PWA, C#
Databases & ORM	SQL Server, Oracle, NHibernate, EF Core
DevOps & Tools	Azure DevOps, GIT, SonarQube, CI/CD, Green-Blue Deployments
Testing & Design	XUnit, NUnit, MSTest, SOLID, Design Patterns, Gen AI, GitHub Copilot, REST API, LLM

Experience

- **Software Engineering Manager, Energy Exemplar** (Aug 2022 – Present)

Led three cross-functional engineering teams to design and deliver the PLEXOS Cloud Platform using Azure, AKS, .NET Core, and Vue.js. Successfully developed and deployed key components including the Centralized License Manager (CLM), core platform foundation services (Identity, Tenant Management, Notification), and a customer-facing Marketplace. Integrated large language model (LLM)-based Generative AI capabilities to extract customer insights and automate customer health scoring. Championed the adoption of GitHub Copilot to enhance developer productivity and code quality.

- **Engineering Manager, Tavisca (JP Morgan Chase)** (Jan 2022 – Aug 2022)

Led team efforts on cloud platform modernization and team mentoring.

- **Technology Lead/Manager, Wolters Kluwer** (Nov 2015 – Jan 2022)

Architected and led the development of TaxWise Online and Mobile platforms. Managed engineering teams and spearheaded the migration to Azure Cloud, implementing CI/CD pipelines and a serverless architecture using .NET Core and Angular.

Adopted a data-driven architecture to enable rapid adaptability to evolving tax regulations, resulting in significant annual infrastructure cost savings. Integrated Azure Cognitive Services to automate form data extraction and streamline workflows, enhancing overall operational efficiency.

- **Technical Lead, Synechron** (Jan 2014 – Oct 2015)

Delivered mobile insurance product iWeb. Led team, performed code reviews, and integrated third-party APIs.

- **Team Lead / SSE, SunGard (FIS)** (Jan 2010 – Dec 2013)

Built Omni Web Solutions for pension recordkeeping in finance domain using .NET and Oracle.

- **Software Engineer, Leo Technosoft** (May 2006 – Jan 2010) Developed various web applications using ASP.NET, SQL Server, Telerik.

Education

- BE – Information Technology, VVP Engineering College, Gujarat (2006)
- Diploma – Information Technology, Ghandhy College, Surat (2003)

Certifications

- Microsoft Azure Fundamentals (AZ-900)
- Registered Scrum Master
- Angular, Azure DevOps, Software Architecture, PLEXOS

Languages

English, Hindi, Gujarati, Sindhi, Marathi

Other Details

- Visited Atlanta, USA (2015) and KL, Malaysia (2008) for client engagement.
