🌐 LinkedIn

Product Manager with 10 years of experience in building and managing complex enterprise solutions. Proven ability to lead cross-functional teams, define product vision, and drive execution. Demonstrated expertise in implementing impactful task management solutions within fast-paced SaaS environments. Strong background in feature prioritization, roadmap planning, and customer migrations. Adept at onboarding new teams and delivering user-centric products through close collaboration with UX and engineering.

WORK EXPERIENCE

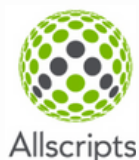

ZEBRA

Nov'21 to Present: Zebra Technologies

Sr. Product Manager

- Leading competitive analysis and go-to-market strategy for next-gen communication and tasking products in global markets.
- Aligning product features with strategic goals and evolving customer needs to maximize value.
- Developing and maintaining a clear, outcome-oriented product roadmap for cross-team alignment.
- Capturing and grooming complex requirements into actionable user stories with Scrum, QA, and Solution Test teams across India and the US.
- Collaborating with UX teams to deliver intuitive, user-centric experiences.
- Conducting product demos and walkthroughs for stakeholders, partners, and customers to drive engagement.
- Presenting roadmap updates and strategic insights to executive leadership for informed decision-making.
- Partnering with Sales, Customer Success, and Solution Consultants to integrate ongoing feedback.
- Coordinating with Product Owners to prioritize Epics for each PI planning cycle.
- Representing the product in strategic forums and global conferences to gain market insights.
- Leveraging tools like Pendo to monitor user behavior and enhance application performance.
- Exploring Gen-AI opportunities by evaluating innovation potential and product-market fit.
- Onboarding completely new development teams by creating detailed documentation and delivering comprehensive product walkthroughs.
- Trained and guided 3 new UX team members within a year, ensuring smooth integration and alignment with product goals.

Apr'20 to Oct'21 : Allscripts
Product Owner/Business Analyst

- Defined product vision and strategy in collaboration with the product management team, and created a clear roadmap to drive execution.
- Led cross-functional product teams to deliver features on time by prioritizing requirements and making decisive trade-offs.
- Worked closely with clients, stakeholders, and engineering teams to ensure successful feature delivery.
- Created detailed product specification documents and conducted reviews with key stakeholders.
- Gained deep user insight to identify product gaps and propose ideas that improved experience and supported growth.
- Documented high-level requirements and user stories to align business and product objectives.
- Collaborated with UI/UX teams to design wireframes, workflows, and visual assets for smooth handoff to development and QA.

Sept'18 to Mar'20 : Firstcry
Assistant Product Manager

- Defined product roadmap aligning user metrics with business goals, setting clear timelines and objectives
- Maintained in-depth knowledge of products/services; recommended enhancements for improved user experience
- Created wireframes and user cases to optimize customer journey and service quality
- Developed strategies to grow new and existing business; identified suitable vendors for project execution
- Prepared business requirement documents and ensured cross-functional compliance
- Supported business leads with financial reviews and key metric analysis
- Conducted market research and usability testing for e-commerce initiatives; managed project communication plans
- Oversaw content creation and mobile marketing campaigns (emails, SMS, push notifications) for the UAE market

Jan'16 to Aug'18 : Extentia
Business Analyst

- Involved in requirement gathering from business stakeholders and working with teams to provide technical validation and consulting
- Involved in project estimation and project planning activities
- Worked extensively on SDLC and Agile methodologies on projects with the clients
- Provide the requirements to the developing team and the client in the form of flow diagrams and functional documents
