Andhra Pradesh, India | P: +91 9550211424, +919014844549 | [somanchisaikrishna@yahoo.com](mailto:somanchisaikrishna@yahoo.com) | [linkedin.com/in/krishna541/](https://www.linkedin.com/in/krishna541/)

## EXPERIENCE

---

### **TSYS (A Global Payments Company) – Pune**

*Feb 2021 - Present*

*SDET Analyst II*

*Project: Heartland Payments*

*Domain: Banking & Financial Services*

- Worked on Automation framework design which is used across the organization by multiple offshore and onsite teams
- Developed automation scripts using C# with NUnit as unit testing framework which evaluates the files generated through batch jobs
- Created an automated bath job that triggers the automation scripts as soon as the parent batch job completes
- Achieved 100% coverage of functionalities and writing scripts following the coding standards
- Reported issues found during test execution as bugs in Rally and did code changes if required
- Contributed possible time resolving blockers/issues faced by the team in reaching the targets with 0% defect leakage
- Contributed my free time in exploring Data Science topics and shared the same across the organization through study circle.
- Worked on back-end development using SQL server (Updating of merchants details based on compliance requirements etc.,)
- Worked on jobs configuration through Active Batch application
- Gave multiple sessions on different technologies which are implemented at different platforms of the organization

### **Tech Mahindra – Hyderabad, India**

*Dec 2019 – Feb 2021*

*Software Engineer (Automation Test Engineer)*

*Project - Thomson Reuters*

*Domain - Document Management System*

- Developed automation scripts using protractor typescript (Jasmine) which is compatible with both angular and non-angular pages with 20+ test scripts
- Executed around 150 test scripts on customer requested environment without involving code changes
- Achieved 100% coverage of functionalities and writing scripts following the coding standards
- Reported issues found during test execution as bugs in azure and did code changes if required
- Maintained 1000+ UFT scripts and ran the same through ALM
- Contributed possible time resolving blockers/issues faced by the team in reaching the targets with 0% defect leakage

### **Tech Mahindra – Bangalore, India**

*Associate Software Engineer (Developer & Automation Tester)*

*Mar 2018 – Nov 2019*

*Project: Premium Credit Limited*

*Domain: Banking & Insurance*

*May 2018 – Nov 2019*

- Created hybrid automation framework using selenium c# (spec flow & console application) with more than 1000 test cases that make sure minimal code change taking future enhancements into consideration
- Made sure that smoke (17 test scripts) and Regression (100+) tests runs on user requested environment without involving code changes
- Ensured 100% coverage of functionalities and writing scripts following the coding standards
- Executed test scripts and optimized performance of the automation tests by 90%
- Build and deploy the automation scripts (selenium BDD – 1000+ and Bots - 11) using Team Foundation Server • Run 1000+ automation tests in the requested environment and server
- Logged Issues found during tests execution as bugs informing Business Analyst and optimized code if required at the application level and automation scripts level
- Customer requirements are met
- Migrated RPA test scripts to selenium c# using console application (Named as Bots Automation by Project) which reduces 70% efforts in production support team

- Scheduled 11 daily jobs, 1 monthly job, and pre-production release jobs through JAMS and report the results to the concerned team
- Collaborated with the team in reaching the targets with 0% defect leakage

**Learn From Home (Training & Assessment program by Tech-Mahindra)**

**Oct 2017 – Mar 2018**

---

## **ACHIEVEMENTS**

### **Client Recognition - Premium Credit Limited, United Kingdom**

- 'Gold Award' for delivering 'Bots' project on time which performs million dollars of transactions per day

### **Organization Level Recognition – Tech Mahindra, India**

- consecutive 'X' Rating for the annual years 2018 to 2019 and 2019 to 2020
- 'Pat on Back' award for fourth quarter of 2019

### **TSYS**

- Runner up in the Hackathon event conducted across the organization (Log Mining using Data Science & Machine Learning concepts)
- Appreciations from client and higher management for successful drive given by me on Data Science to all the employees

---

## **EDUCATION**

### **NRI INSTITUTE OF TECHNOLOGY – Vijayawada, India**

**2013 - 2017**

Bachelor of Technology, Mechanical Engineering; Aggregate: 73.3%

---

## **SKILLS**

### **Technical:**

- Selenium web driver (c# Spec flow, Java cucumber)
- Protractor with Typescript and Java script (Jasmine, cucumber)
- HTML/CSS
- asp.net
- SQL
- Jams
- Agile Methodologies
- Team Foundation Server
- Active Batch
- Good Knowledge on C#, Java & Python programming
- Data visualization using python (Matplotlib, seaborn, plotly)
- Basic knowledge on Machine learning using Natural Language ToolKit , pandas, numpy etc.,

**Languages:** Fluent in English, Telugu; Conversational Proficiency in Hindi, Kannada

- Communicate with clients to gather requirements and develop application accordingly
- Initiate discussion with the team to confirm client need and develop strategies/plans to accomplish goals in a given time

### **ANALYTICAL**

- Assessing project complexity and implementing better approach TEAM WORK
- Co-ordinate effectively with others to meet goals.
- Schedule knowledge sharing sessions and Co-ordinate
